Reaching the heights in the job by implementing the knowledge gained in the world of Information Technology and work optimally to fulfil the need of the organization.

KEY SKILLS:

- 6+ year experience in native Android applications development using Android SDK, developing Java web based applications using Core Java, J2EE, Web Services, Hibernate and JSPtechnologies.
- Process expertise in java development and mobile UI-design/Framework skilled at progressingfrom problem statement to well documented designs.
- Enthusiastic, hardworking, quick learner, good inter-personal communication and always eager to take up new assignments.
- Good understanding in implementing design patterns such as Singleton Pattern, Adapter Design Pattern, MVC and MVP pattern.
- Strong knowledge of Android UI design principles, patterns, and best practices.
- Knowledge of application testing, debugging and troubleshooting.
- Good communication skills, interpersonal skills, self-motivated, good team player.

TECHNICAL SKILLS:

- **Android Development:** Java
- **iOs Development:** Objective C, Swift 3
- **Framework:** Android Studio, Eclipse, React Native framework
- **Hybrid Development:** PhoneGap, Ionic Framework, Titanium, Cordova, Sencha Touch 2, Appcelerator, Basic4Android, JQuery Mobile, Dojo Mobile, Sproutcore, Theappbuilder, DHTMLX Touch, Mo Sync SDK
- **Web Development:** PHP, node.js, Angular JS, MySQL, MongoDB
- **Game Development:** Cocos2d-x
- **Unit Testing:** XCTest, KIF, KIWI, Frank
- **Version Control:** Git, SVN
- **Source Control:** Pods, Carthage
- **Distribution & Analytics:** Apple TestFlight, Fabric, HockeyApp, Flurry, Diawi, and Google Analytics
- **Methodologies:** Agile, Waterfall, Scrum
- **Coding Method:** MVP and MVVM, RxAndroid
- **Payment Gateway:** PayPal, Stripe, Authorised.net, Braintree, PayUmoney, CCAvenue, Paytm Wallet, Google Checkout
- **Project Management:** Jira, Asana, Basecamp, Lighthouse, Trello, Slack, Subversion, Pivotal Tracker
- **Continuous Integration System:** Hudson, TeamCity
- **Database:** ORMLite, Realm
- **Transmitting Network Data:** Google Volley and Retrofit
- **View Injection:** Dagger2, Androidannotations

ROLE & CONTRIBUTION:

- Known for writing efficient, maintainable and reusable code.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Unit-test code for robustness, including edge cases, usability, and general reliability
- Development and implementation of Core functionality and support tools.
- continuously evaluate, and implement new technologies to maximize development efficiency
- Proficient in design, data structures, problem-solving, testing and debugging.

EDUCATIONAL QUALIFICATION:

Master in Computer Application
KSV University
First Class with Distinction
Year – 2010

EXPERIENCE:

FoodQ, India   **[May 2016 – Present]**
We all love to go out and try new restaurants. But a long waitlist can ruin a culinary experience before the first bite. FoodQ was born from our food-loving team's frustration about waiting—and our always-churning creative minds. FoodQ allows user to jump in to the waiting queue from anywhere and replaces the traditional reservation system with a real-time application. It provides many features like placing the order with digital menu, pickup & feedbacks for end users. FoodQ redefines restaurant business with a smart dashboard providing different analytics, reports, bulk SMS with graphs, easy billings system and many other unique features.

Key achievement:
As a Founder of FoodQ, I have made the product developed and launched in my city with the great team of mobile and web developers. We signed up with more than 75 restaurants in very short time and also recognized by reputed newspaper for our efforts and help to the people of our city

Priority Pass, USA   **[Dec 2015 – April 2016]**
Contracted as an Android Application Consultant to help and manage developers working on a mobile platform for very reputed companies in USA and UK. Designed to help Priority Pass Members find an airport lounge anytime, anywhere, this app searches the database of lounges worldwide and its enhanced functionality improves the user experience. Users can search for a lounge by typing the name of a city, country or airport or simply scroll through lists.

Key achievement:
That app was required to generate QR codes for every member and same way read data of users through QR scanning. Also, due to security reasons, it was requiring to encode/decode data.

Dotcom LB, Lebanon   **[Feb 2015 – Dec 2015]**
Dotcom LB – Lebanon-based company leading end-to-end content engagement platform provider, has always helped organizations use content in meaningful and engaging ways. I worked as Senior Developer to develop Android application using Restful web service to provide text, audio and video contents

Key achievement:
This project had a main challenge to manage the language barrier and provide the complete localized solution.

Cigar Boss, USA   **[Aug 2014 – Dec 2015]**

Look up information on thousands of cigars, rate your favorite cigars, find professional cigar reviews & find local cigar shops in an instant! Months in the making, Cigar Boss is sure to become your go-to app when you are looking for cigar information!

Key achievement:
Cigar boss is the No1 app on the store for cigar related information. It serves A-Z information about Cigars.

Conscious App Inc, USA   **[May 2012- Aug 2014]**

The Life Purpose App provides full access to Dan Millman's newly revised, bestselling book, The Life You Were Born to Live — at your fingertips! Instantly look up your own and friends' life paths, life cycles, relationship energies and key spiritual laws to help you overcome any hurdles on your life path.

Key achievement:
This application has a very complex algorithm to find the user's life path based on their birth date.

Melindas Gluten Free Goodies, Australia   **[May 2010 – April 2012]**

The allergy free entertaining app search function lets you select exactly the allergy free options you need, personalized for your guests.

Key achievement:
In this app, user can search for recipe based on various filters and taste choice
